Testing

Hand Signals
Voice Signals
Written Exams
Practical Exams

All attendees that successfully complete the course will receive a certificate of training and carrying card stating that they have received basic fundamental training and testing to help establish that they are qualified. The employer is ultimately responsible for determining a person's level of qualification. A copy of the testing will be sent to the employer for their employee records and to help them assess each of their employee's level of qualification. Proof of training and testing should be maintained by the employer to satisfy OSHA requirements for record keeping. Additional training relevant to the work being performed, and established procedures should also be documented in the employees file.
